- Dusters

IMPORTANT TOOLS IN YOUR GREEN-CLEANING PROGRAM

Improves cleaning effectiveness and fights cross contamination

Significantly reduces the consumption of water & chemicals

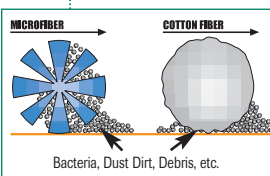

Light weight and highly maneuverable, improving productivity & worker safety

DEFINING GREEN

The definition is derived from Presidential Executive Order 13423: Green (or environmentally preferable) is defined as "products and services that reduce the health and environmental impacts compared to similar products and services used for the same purpose." Simply stated, it's all about selecting and using cleaning practices and products that protect building occupant's and cleaning personnel's health without harming the environment.

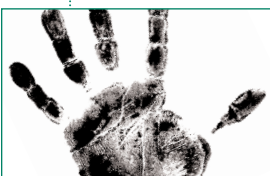

WHAT IS MICROFIBER?

Microfiber is an ultrafine synthetic fiber that is very durable, launderable and lint free (unlike traditional cotton mops). Each fiber is split during the manufacturing process, creating sharp edges which make it very effective for absorbing, accumulating and removing virtually any type of dirt, dust, grease or contaminant. Microfiber mopping and dusting products can be blended with materials to improve performance for specific applications. For example, by adding synthetic stiff brush fiber strips, it can further improve its ability to clean and remove tough soils. And because they are launderable up to 500 times they reduce impacts on the environment compared to either single-use disposable products (paper and cloth dusting products) or those that cannot be laundered as frequently (cotton mops and/or inferior microfiber products).

WHY IS MICROFIBER GREEN?

Because of the unique construction, microfiber is greener than traditional cotton mops because they can significantly reduce the consumption of water and chemicals used during the cleaning operation. Furthermore, microfiber mops are lighter and easier to "push" compared to a fully loaded traditional 24 ounce cotton mop reducing the potential for back injuries and fatigue further improving cleanliness and worker productivity. Additionally, a complete microfiber system is considered to be an important element of a comprehensive Green-Cleaning program as per various published "road maps" such as: The US Green Building Council's (USGBC) LEED for Existing Buildings Rating System (LEED-EB:OM), the Healthy Schools Campaign's Quick & Easy Guide to Green Cleaning in Schools and Practice Greenhealth's Green Guide for Health Care.

HOW DOES MICROFIBER REDUCE CROSS CONTAMINATION?

Traditional cotton mop & bucket systems are unsanitary because the same mop head is typically used throughout the entire facility. The cotton mop is submerged in a contaminated bucket of water, wrung out and used to clean hallways, rest rooms and food service areas, often with no change in the mop used or the bucket water, promoting cross contamination. In a microfiber program, a new mop head is used in each area of the facility. Multiple mop heads are stored in a solution bucket. When the worker begins cleaning a new area of the building, a clean mop is used. Once the mop head becomes soiled, it is removed and placed in a laundry bag, never coming in contact with the clean mop heads. Additionally, mop heads and dusting cloths are available in multiple colors, allowing the user to color-code for various areas of the facility and/or procedures.

HOW DOES MICROFIBER IMPROVE PRODUCTIVITY AND WORKER SAFETY?

Microfiber mops are typically eight times lighter when compared to traditional cotton wet mops; thus, physical stress on the arms, neck and back is greatly reduced. The lighter weight allows the user to move much faster, resulting in higher levels of productivity.

Microfiber Mopping Products

A10002

Super Sorb Tube Mop This looped-end, wet mop is environmentally friendly because it requires less chemicals than cotton/blend yarn mops. Microfiber material offers excellent absorbency, as well as superior scrubbing power. Mops can be laundered 400 times.

Mop features a 5" wide headband to be used with jaw type handles.

C138024

C143018

Fringed Mop & Fringed Mop w/Scrub

Made of 100% microfiber. Flat mops can be used in wet or dry applications. Looped end edges allow better dirt and dust collection. Looped-end edge styles are available in cut-end center with scrubs for scuff marks and looped-end center for scrubbing. Both flat mops accept velcro frames.

Microlooped Microfiber Velcro & Canvas Backed Dust Mops

Microfiber dust mops pick up dirt and dust electrostatically. These mops are more efficient and last longer than typical cotton/blended dust mops. Microfiber dust mops are available in both conventional keyhole style backing that accepts industry standard dust mop frames as well as hook and loop backing for velcro frames.

C092036

C091018

The ability to pick up twice as much dirt as a 100% cotton, looped-end dust mop makes the **Microlooped Dust Mop** a great performer. Can also be used as a wax application mop. Fits any conventional dust mop frame.

Can be laundered 150 times.

The **Duraloop Wet Mop** picks up twice as much liquid as a standard blended looped-end mop. Can be used as a wax application mop.

Use with Jaws type wet mop handles.

Can be laundered 150 times.

Microfiber Cloths & Mitts

E220022

E223022

Supremo™ Microfiber Cloths

Now available in a larger 16" x 16" size. All purpose cleaning cloth that is great for dusting and cleaning all types of surfaces. Color-coded to ensure proper usage.

Use wet or dry. Can be laundered five times more than 100% cotton towels.

Supremo™ Microfiber Mitts

These mitts have the same qualities as the Supremo™ Microfiber Cloths. Convenient mitt design allows easier cleaning in hard-to-reach places.

Glassic™ Microfiber Mitts

With the same characteristics as the Glassic™ Microfiber Cloths, these convenient mitts are designed to more easily access hard-to-reach places.

Glassic™ Microfiber Cloth

Now available in a larger 16" x 16" size. This cloth is perfect for cleaning soap, grease or finger prints from windows, mirrors and polished metal surfaces. Leaves a streak-free finish. Can be laundered five times more than 100% cotton towels.

Microfiber Duster

Microflex™ Duster

Flexible, thin foam frame allows effective cleaning in tight, hard-to-reach areas. Frame accepts a hand held handle or either one of our Pro Flat mop handles for high area cleaning.

Microfiber refills are durable and made to last - simply rinse away dirt with water after every use.

Microfiber Flat Mopping Products

Super Pro II™ Microfiber w/Scrub Refills

Cut-end construction designed to penetrate into cracks and crevices in the floor. Fibers allow maximum scrubbing action to the floor's surface. Scrubbing strips remove scuff marks. Microfiber yarn allows up to 500 washings. Hook and loop backing allows easy attachment and removal from velcro® strip frame. Can be used damp or wet.

C128018

Super Pro II™ Microfiber Refills are made of 100% Microfiber and are launderable up to 500 times. Looped-end construction and Perma-Stitch sewn border guarantee extreme durability. Hook and loop attachment for easy installation and removal from frame. Use for damp or dry mopping.

The **Duster™ Microfiber Refill** is specially designed to attract dust much like a cut-end dust mop but has the strength and durability of Microfiber. Use to pick larger particles before damp mopping or disinfecting. Can be laundered 100 to 150 times.

C109020

The Innovative **Aggressor™ Microfiber Scrubbing Refill** is designed to remove debris stuck to the floor that normal "yarn only" Microfiber Flat Mops cannot. This is accomplished by using both microfiber yarn and synthetic stiff brush fibers.

Charger™ Disposable Sheets pick up dust, dirt and hair by creating a static charge that traps debris within the mops' tiny fibers. Using this inexpensive, disposable dust mop aids in cross-contamination prevention for health care environments. Conveniently packed in 200 pre-cut sheets per box. Attaches easily to the SpringBack™ Mop Frame. This item is not Microfiber - constructed of polyethylene.

Super Pro™ Finish Mop Microfiber Refills are constructed of looped-end, high-wet modulus rayon blend yarn that provides quick, controlled liquid release. Unlike conventional finish mops, 100% of the floor finish goes onto the floor along with full contact of the refill to the surface allowing better productivity and less chemical wasted in the mop.

C717018

The **Pro II™ Flat Mop Frame** has a lightweight design that allows for dramatic improvements in labor productivity. Trapezoid head effectively cleans corners and edges. 360° swivel attachment for maneuvering in tight areas. Handle Locking Clip to secure handle to frame connector. Designed to compliment our line of Microfiber refills.

C716024

Constructed of heavy-duty aluminum with a spring-loaded attachment, the **Springback™ Mop Frame** will hold up to three Charger™ disposable sheets. Removable 1/4" thick foam pad allows for easy maneuvering while dry dust mopping. This frame can also be used with our 26" Microfiber refill pads. Frames can be used with our current Pro™ Flat Mop Handles.

Pro™ Flat Mop Handles are made of lightweight, long-lasting aluminum that will not rust or corrode. Twist-lock mechanism allows extendible handle to adjust from 39" to 60". Available in extendible (C714000) and 60" fixed (C714060) sizes.
